

Appendix C

Incremental Changes to the Proposed Action

1. Proposed Treatments for Unit 76: An error occurred in the original prescription summary table of the proposed action. The error has been corrected in Table 2.1. of the proposed action description in Chapter 2. Unit 76 is prescribed for “Surface Fire Rx” with “Underburn” treatment for Emphasis Areas 4, 5, 6 and 7.
2. Clarification of Treatment Methods for Units 76 and 99: The original prescriptions for these units have not changed; however the wording on the prescription summary table of the proposed action has been modified for clarification. Those units are proposed for “Mastication” treatment to meet the “Plantation Thin” prescription; the original proposed action table indicated “Mastication, Mechanical” for those units and the wording has been changed to just “Mastication” in Table 2.1 of the proposed action description in Chapter 2.
3. Existing Forest Development Road 11-6 is proposed to be changed from Forest Service Maintenance Level 1 to Maintenance Level 2. This administrative change would more accurately reflect the current conditions on the ground and the existing use that is occurring on the 11-6 road. No changes to the physical environment of the 11-6 road beyond existing conditions are proposed in this undertaking. (Chapter 2, Road Management)
4. Construction of 3.8 miles of temporary roads under Alternative 1 was disclosed on the map of the Proposed Action distributed during public scoping. Text has now been added to the Proposed Action which further details the disposition of the temporary roads. (Chapter 2, Road Management)
